EXPERIENCE

Software Engineer

June 2020 – Dec. 2023

FFW (ffw.com)

Holmdel, NJ

Pfizer is a leading pharmaceutical corporation renowned for innovative drug development and healthcare solutions

- Developed and optimized user interfaces using Vue.js, Drupal, JavaScript, HTML, CSS focusing on seamless integration and engaging user experiences across various web platforms.
- Devised a templating solution for UI development leveraging Gulp, resulting in a 35% faster environment setup and 10% faster development
- Coordinated workflow with UI/UX designers, ensuring seamless integration and effective collaboration. Actively cooperated with back-end developers in building and integrating RESTful APIs, contributing to the development of robust and user-friendly interfaces
- Conducted interviews for the selection of frontend developer candidates, assessing their skills and suitability for the role
- Designed and developed software solutions with a focus on accessibility, ensuring that applications cater to users with diverse abilities by adhering to WCAG standards

Front-end developer

Aug. 2018 – June 2020

Grid Dynamics (griddynamics.com)

Dnipro, Ukraine

RockHer is a specialized online retailer of custom engagement rings and fine jewelry

- Implemented an automation process for creating mini-site templates based on client-provided design drafts, resulting in a 54% acceleration in development time
- Designed the architecture for revamping an outdated Magento e-commerce site, integrating Vue.js, BEM methodology, HTML and CSS (SASS). This enabled a seamless full redesign and refactoring without site downtime, subsequently boosting the online store's performance by 30%
- Emphasized code optimization and quality assurance to enhance the scalability and performance of frontend applications.
- Executed cross-browser HTML5 and CSS3 redesigns with a focus on semantic elements
- Led a team of six software development professionals, fostering collaboration and successful outcomes

Front-end developer

Feb. 2017 – May 2018

DNA Team (dnateam.io)

Dnipro, Ukraine

- Created product websites, overseeing end-to-end development lifecycle
- Conducted thorough code reviews and implemented enhancements through code refactoring
- Designed new, reusable components to enhance development efficiency
- Crafted cross-browser HTML5 and CSS3 with a focus on semantic elements, ensuring optimal user experience

Front-end developer

Jan. 2016 – Feb 2017

Freelance — Self-employed

Dnipro, Ukraine

- Developed responsive UIs and transformed designs into interactive elements
- Maintained a clean and scalable codebase in HTML, CSS, and JavaScript

- Collaborated closely with designers and ensured best coding practices
- Stayed updated with front-end trends and effectively communicated project details

System Administrator — WEB-Servers and Databases

Oct. 2013 – Nov. 2015

WorkRocks (workrocks.com)

Dnipro, Ukraine

- Led the setup and configuration of web servers, ensuring seamless functionality and high availability of services
- Managed MySQL databases with precision, orchestrating installations, upgrades, and scheduled backups to safeguard critical data
- Monitored system performance with diligence, promptly identifying and addressing issues to maintain smooth operations
- Collaborated closely with development teams, providing technical support and expertise to facilitate the seamless deployment of applications

Senior specialist of IT support

Oct. 2009 – Oct. 2013

PJSC KB “Nadra”

Dnipro, Ukraine

- Spearheaded the strategic design, thorough implementation, and continuous maintenance of a local network affiliate in the Dnipropetrovsk region
- Ensured seamless integration of IT systems by working closely with departments, aligning technological strategies with organizational objectives
- Managed a dedicated support team of 3+ members, providing them with expert guidance, hands-on coaching, and technical leadership
- Assumed responsibility for overseeing the identification, troubleshooting, and successful resolution of intricate technical challenges
- Provided timely and effective support to end-users, maintaining high levels of system uptime and user satisfaction
